

Portfolio Project – Project Setup

Overview

We should now know how to setup a basic HTML & CSS Project

Goals

1. **Setting up an HTML & CSS Project:** Create a website with 2 pages and link them all together using a navigation bar with links.

Specifications

Specification for HTML & CSS Project

- Create a website with 2 separate pages:
 - o A Home page
 - o A Contact Us Page
- On each page as a navigation bar that links to all other pages
 - o E.g: On the Home page I should be able to navigate to Contact Us
 - o On the Contact Us page I should be able to navigate to Home
- The navigation bar should be created using CSS flex and HTML
 - o You can add any styling you would like to this nav bar
- Each page should also have a header section with an h1 and p to describe the purpose of the page
