

Portfolio Project – CSS Grid Gallery

Overview

We can now create responsive layouts using CSS Grid, this challenge will reinforce what you've learned.

Goals

1. **Creating a CSS Gallery:** The main task is to create a 3 column gallery in CSS.

Specifications

Make the following changes to your project:

- Create a 3 column gallery on your Home page
 - o Each column should be the same width (1fr, auto)
 - o Each column should have some space between them
- You can add any additional styling you would like
 - o Look into CSS box shadow and border-radius (not required)
- Make sure you have at least 6 pictures that relate to your interests
 - o Make all the images the same size in CSS
 - o Make sure all images have padding and a border
