Portfolio Project – Contact Form

Overview

We are now comfortable adding forms to our HTML pages using input, select and text area. In this challenge we will flex these newfound skills.

Goals

1. **Creating a contact form:** We need to create a place where users can give us feedback and leave messages for us.

Specifications

Your project should have the following:

- Create a contact form in a main section on your Contact Us page
- Form should have the following fields:
    - o   Email (text input)
    - o   Full Name (text input)
    - o   Message (text area, 3 rows, 20 cols)
- Below the form create the following buttons:
    - o   Clear
    - o   Submit
- Every field in your form should have a label
- Use CSS grid to organize your form
    - o   Labels column should be half the width of the fields column
